HONSON HS300 Brass sliding Fittings for PEX pipe are well-designed and suitable to use in plumbing system. The fittings are available in sizes from $\varnothing 12$ to $\varnothing 25$. Easily installed and disassembled.

Structure

Item	Description	Materials
1	Nut	CW617N-DW / MS58
2	Body	CW617N-DW / MS58

Features

- Ideal for use in plumbing system
- Fast and simple installation
- sizes from $\varnothing 12$ to $\varnothing 25$

Installation Instruction

1. To avoid incorrect assembly, you should check the dimensions of the components before installation.
2. Cut the pipe perpendicular to its axis, using a shears (you are advised to rotate the shears slightly while you are cutting) or the wheel pipe-cutter.
3. Deburr and calibrate the internal surface of the pipe with appropriate tools.

4. Insert the pipe on the body up to the mechanical stop.
5. Slide the nut onto the pipe and move to the mechanical stop on the body.
6. Tighten the nut with suitable claw.
